

It also contributed to this, that on 19 -20 April 2018, the second international project meeting was held in Gondomar, Portugal, organized by Cindor, in accordance with our original schedule.

The international project meeting played a major role in the implementation of the European Ecological Footprint Optimisation project. At the conference, among other things, we have jointly defined the topics along which intellectual products (videos) are being produced.

The topics, in line with the 21st Century Environmental Guidelines, are water, energy, garbage and starting from the education segment, the ecological footprint of schools.

The other two agenda items of the conference were the elements of the dissemination and interim report.

Under the terms of the grant agreement and the partnership agreements with the partners, on the progress of the project, by 30th June 2018 the first interim report was submitted to the Tempus Public Foundation (National Agency), which meant an extremely large amount of data content and data upload as well. A number of publications, illustrations, images and

dissemination material were produced in this first year. Partners continually report on the progress of the project on their websites and community pages. Therefore, the contact was continuous between the partners and the project coordinator Humob Group Kft.

By the end of the summer holiday, we started organizing the third transnational project meeting. The event will be held on 28-29 October 2018, in Lund, Sweden.

Based on our results, we are confident, that we can fulfill the application commitments by the deadline. Our next newsletter will be published in February 2019.
