

## ABOUT THE PROGRESS OF THE EUROPEAN CARBON FOOTPRINT OPTIMISATION PROJECT

This time we report on our work performed for nearly a year for the third time.

The third international meeting organized by ProIFALL was held in Lund, on 29th and 30th October 2018. Our important task was to discuss the didactic and methodological application of the

intellectual outputs (videos and e-comics).

In the life of a project lasting several years, personnel changes also occur, so new colleagues were also introduced at the meeting.

In addition, thinking about continuing the ECO2 project as well, Emil Sigbrand attended the meeting

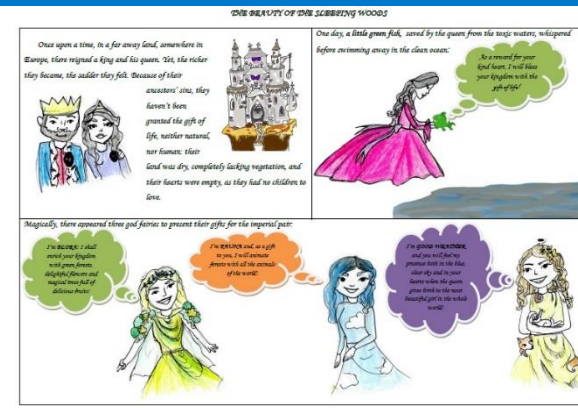

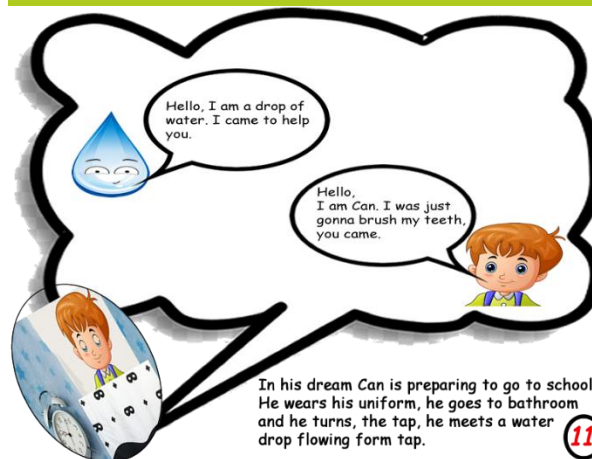

on behalf of the Danish Board of Technology, as an added value of the meeting.

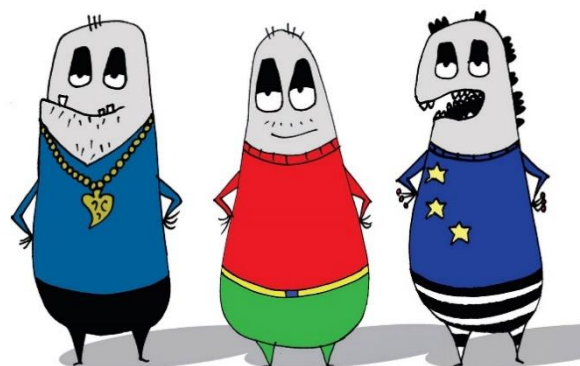

In the framework of the ECO2 Strategic Partnership project, HuMob announced a video-making contest at ÉSZC Kossuth Zsuzsanna Vocational Technical School and Youth Hostel. The videos presented the topic of the ecological footprint. Each of the four video maker teams was awarded money prize. The videos can be seen on the ECO2 project website. [www.co2optim.eu](http://www.co2optim.eu)

In September 2018, with the participation of more than 50 people, Cindor (Portuguese partner) organized the first multiplier event which was an environmental day. The creation of eco-comics that are processing environmental issues and

can be adapted for educational purposes has also begun.

Under the terms of the grant agreement and the partnership agreements with the partners, on the progress of the project, by 31<sup>st</sup> January 2019 the first interim report was submitted to the Tempus Public Foundation (National Agency), which meant an extremely large amount of data content and data upload as well.

- Gang Y (why?) -

São um grupo de amigos muito diferentes, mas que têm a nascer uma veia associativa bastante forte.  
Juntos, vão viver muitas aventuras em Portugal e na Europa!

produced in this first year. Partners continually report on the progress of the project on their websites and community pages.

Our next and last newsletter will be published in June 2019.
